

Jaslo 30/05/2014

A company 95% owned by Lotos Refinery. Plastekol main business is the recycling of oils and all plastic, bottles and containers after oil contamination.

Translation of attached reference;

Plastekol Recycling confirms that we are cooperating with ACG Technologie Ekologiczne.

ACG Technologie Ekologiczne is a reliable manufacturer and supplier of modern safe chemicals, particularly EG360 which we are using for cleaning and degreasing after petroleum contamination - pipelines, cisterns, tanks, warehouses and oil separators.

We also use ACG EG540 which is very effectively being used for contaminated oils recycling.

We recommend this company to all companies from petrochemical sector.
